Something else to consider - usability

- How restrictive is the use of several authentication mechanisms?

- How the users will use handle and appropriate the authentication process?

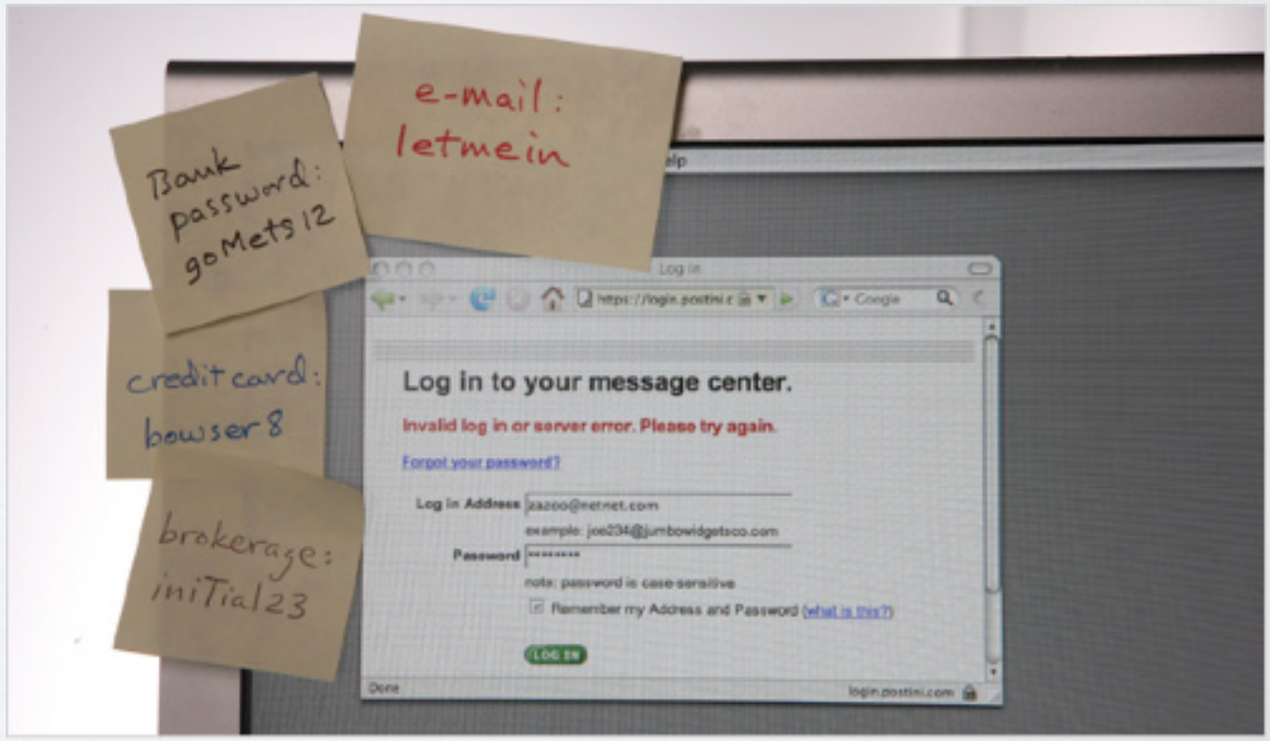
Something else to consider - usability

- How restrictive is the use of several authentication mechanisms?
- How the users will use handle and appropriate the authentication process?



To go further

- Can the authentication process been delegate to a third part?
- Can we use the same identity over different information system?

➡ Identity management systems
