

Something else to consider - sustainability

- How restrictive is the use of several authentication mechanisms?
- How the users will use handle and appropriate the authentication process?

Something else to consider - usability

- How restrictive is the use of several authentication mechanisms?
- How the users will use handle and appropriate the authentication process?

To go further

- Can the authentication process be delegated to a third party?
- Can we use the same identity over different information systems?

➡ Identity management systems
