

Buffer Overflow Attacks

What's the idea?

➡ Injecting wrong data input in a way that it will be interpreted as instructions

How data can be used in transactions?

➡ Because the data and instructions are the same thing
binary values in memory

When was it discovered for the first time?

→ Understood as early as 1972, first severe attack in 1988

Buffer Overflow Attacks

What is the idea?

- ➔ Injecting wrong data input in a way that it will be interpreted as instructions

How data can become instructions?

- ➔ Because the data and instructions are the same thing binary values in memory

When was it discovered for the first time?

- ➔ Understood as early as 1972, first severe attack in 1988

What you need to know

- Understand C functions
- Familiar with assembly code
- Understand the runtime stack and data encoding
- Know how function calls are performed
- Understand the `exec ()` system call
