

**70's - The era of
the first self-replicating programs**

The era of the first self-replicating programs (70's)

ANIMAL (a popular game)

- Replication through the filesystem
- No effect

Simple Joke

Creeper (and **Reaper**) on Tenex OS (Arpanet)

- Replication through a modem and copied itself to the remote system

Disruptive

- Displays the message

I'M THE CREEPER : CATCH ME IF YOU CAN

The **Rabbit** program

- Replication through the filesystem
- Reduces system performance till crashing

Destructive
