Choosing the authentication mechanism

�ड Driven by the risk analysis and the costs
How hard is it to?

- Make you reveal your secret password

- Duplicate a credit card

- Fake your fingerprints

◉ There is no perfect authentication

Choosing the authentication mechanism

➡ Driven by the risk analysis and the costs
How hard is it to?

- Make you reveal your secret password

- Duplicate a credit card

- Fake your fingerprints

◉ There is no perfect authentication

PASSWORD ACQUIRED

Something else to consider - usability

- How restrictive is the use of several authentication mechanisms?

- How the users will use handle and appropriate the authentication process?
