# Point-to-Point Link

Only two hosts are connected at each end of the medium

e.g. OTN, IRDA, DSL …

➡ Harder for an attacker to intercept messages

Bus Link (a.k.a LAN - Local Area Network)

<u>Several hosts</u> are connected to the same medium
with a unique physical address called

   e.g. Ethernet and WiFi uses MAC
   Media Access Control addresses

➡ Easier for the attacker to intercept messages since they are
   all broadcasted to the same medium
