

Millions of student records compromised: Why overseeing education technology companies is crucial

April 20, 2026

Case of Note: [Privacy Complaints MR25-00002 to MR25-00011, MR25-00013 to MR25-00021, MR25-00026 and PR25-00002](#)

Background

In January 2025, 20 Ontario school boards and the Ontario Ministry of Education (collectively, the institutions) independently reported a breach of PI to the Office of the Information and Privacy Commissioner of Ontario (IPC). The institutions reported that a cyberattack occurred against their edtech provider, PowerSchool Canada ULC (PowerSchool). The company provides data management services and stores data related to students and educators from kindergarten to Grade 12.

Millions of students' personal data stolen in major education breach

by Pieter Arntz | May 6, 2026

Instructure, the company behind the Canvas learning management system (LMS), confirmed a cyber incident and subsequent data breach affecting its cloud-hosted environment.

The ShinyHunters ransomware group claims it is behind the attack and says it stole roughly 275 million records tied to students, teachers, and staff.
