

# WEP - Wired Equivalent Privacy

- ➔ A random number IV (24 bits only) transmitted in clear between the clients and the base station

$$\text{RC4\_key} = \text{IV} + \text{SSID\_password}$$

- ⦿ 50% chance the same IV will be used again after 5000 packets

# ChaCha20 (a variant of Salsa20)

|          |                   |
|----------|-------------------|
| Key Size | 128 or 256 bits   |
| Speed    | ~ 4 cycles / byte |
