

The security of RSA

RSA Labs Challenge : factoring primes set

Key length	Year	Time
140	1999	1 month
155	1999	4 months
160	2003	20 days
200	2005	18 months
768	2009	3 years

Challenges are no longer active

Largest RSA number factored so far

In September 2026, Eric Lu has factorized RSA-260
(862 bits key, ~ 74 bits entropy)

“In total, I estimate that this factorization cost about 4,900 GPU-days, or 13.5 GPU-years, which is about \$400k at current market prices.”
