# Identification vs Authentication

## Identification

- Assigning a set of data to a person or an organization (usually called the *subject*)

## Authentication

- Making a safe link between a subject and one or several of identities

# Authentication Factors

## Something that you know

- ✓ Password, PIN number, secret handshake, passphrase, secret key, secret questions …

## Something that you have

- ✓ IDs, physical key, badges, smart card, mobile phone, hardware device …

## Something that you are or do (biometrics)

- ✓ Fingerprint, voice recognition, face recognition …
