Stealing someone's password

How to get a password in clear?

- Social engineering - Phishing
- Data mining (emails, logs)
- Keyloggers (keystroke logging)

How to get an encrypted or hashed password?

- Know where it is stored and breach that storage

How passwords are stored

- **In clear** (really bad)
- **Encrypted**
  (undesirable in most cases and complex to manage)
- **Hashed** (bad)
- **Salted Hash** (better and easy to manage)
